- C++, HTML, CSS, Python, Java
- Data Analyst
- Critical Thinking
- Strong problem-solving
- Linux, AWS, Google Cloud
- IT Project Management

- Microsoft Active Directory and Exchange
- Hardware and Software
- Troubleshooting, Virtualization Technologies (VMware, VirtualBox)
- Mobile Device Management
- Management, Endpoint Security

Languages: *Spanish and English*
Certifications: Foundation of Cybersecurity **–** Coursera 2024

PROJECTS

AI Lab Research   Jan 2023- Dec 2023

Actively participated in research focusing on the practical application of ethical AI principles and responsible AI practices. Demonstrated a commitment to continuous learning by actively listening and absorbing insights. Gained valuable knowledge and perspectives on the responsible integration of AI into various societal domains and the future implications of AI technologies.

Software Development Capstone   Jan 2023 - Dec 2023

Participated in a team environment to develop and implement the ABET Data Tracking and Reporting System for the CSE Department, led by Project Sponsor Dr. Stephanie Ludi. Applied expertise in bug fixing, diligently identifying, and resolving issues within the ABET Data Tracking and Reporting System to enhance overall system functionality and user experience. Utilized my coding skills to contribute to the development of the front end of the website. Developed programming solutions in C and C++, demonstrating strong problem-solving abilities and collaborative teamwork to meet project objectives.

EXPERIENCE

Baltazar Imports Inc, Canton, Tx   Jun 2018 - Aug 2019
IT Service Desk Analyst Intern

- Conducted computer diagnostics and referred to technical manuals to investigate and resolve issues.

- Monitored system performance, identifying, and resolving routine operational problems.

- Maintained accurate records and files related to departmental responsibilities
